

IN THE SPECIFICATION:

Amend the following paragraph.

[0026] Spring 120 presses against the top support surface 202 of support member 200 (on first contact surface 103) and the inner surface of cap 105, pushing cap 105 upward. That upward force pulls base 115 up against the ~~lower~~ support surface 156 of object 150 through the contact area indicated by 113 on a second contact surface 117, which, in turn pushes the reference surfaces together.
